

Inline Aeration/Oxygenation Manual Unit

For instant wort
aeration/oxygenation

- Micro bubble size
- Instant saturation
- Sterile gas and steam filters

Principle

Oxygen or air is injected into the wort through Bucher Denwel Injector, which splits the gas into micro bubbles. Most efficient and instant saturation of the gas is achieved with only a minimal pressure drop, no gas loss and a fully hygienic design. No static mixer or sinter candles needed.

The system includes a sterile filter for cleaning the gas and a steam filter cleaning the steam used for sanitization of the sterile filter.
