NEXT GENERATION UNIMIX

UNIMIX®

UNIMIX®

UNIMIX 1000S

NEXT GENERATION USABILITY

THE NEW SIMPLICITY of our user-optimized machine interface saves time, personnel effort and costs. It's sophisticated functionality ensures faster and more efficient processes that are traceable and reproducible at all times during the complete production. It has never been easier to reach a smooth operation and best results.

USABILITY

UNIMIX INTERFACE

WHAT'S IN FOR YOU...

InterAction

Control / observe / visualize

SmartCatch

Record and visualize all entries on the user interface

RecipeCreator Matrix

Fast and easy creation of recipes on HMI

BatchReporter

Batch related process values, operator identification, messages and set points/actual values

RecipeCreator FlowChart

Create complex recipes with a flow chart manager

PC Workstation

Separate workstation for recipe creation

Dashboard

Visualization of multiple vessel systems

Electronic Signature

Release process-critical inputs by an electronic signature

UNIMIX®

NEXT GENERATION PRODUCTIVITY

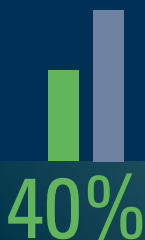

SIGNIFICANT INCREASE IN EFFECTIVENESS compared to conventional technology using sophisticated mixing and homogenizing technology. Our experience combined with technology ensures high quality which is highly appreciated by the UNIMIX users.

PRODUCTIVITY

INCREASE YOUR PRODUCTIVITY with our new UNIMIX Next Generation units.

Thanks to our good know-how in mixing and homogenization technology we can offer you:

40% SHORTER PRODUCTION TIMES
than conventional systems are the result of ingenious mixing and homogenizing technology

99.6% YIELD POSSIBLE
with our innovative solutions for yield-improvement

100% PREMIUM QUALITY OF PRODUCTS
driven by our experience and technology which is appreciated by UNIMIX users

- Finest dispersions of powdery ingredients
- Narrow, monomodal particle size distributions in emulsions
- Lump free dispersing of thickeners
- Brilliant and smooth textures of emulsion-based products

FLEXIBILITY

The UNIMIX technology provides an **ECONOMICAL SOLUTION** for:

- **High output products** such as shampoos, conditioners, lotions and toothpaste
- As well as for **high-end single batch** productions as mascara, anti-aging creams and other exclusive products

Maximum flexibility at every vessel size allows production volumes from

UNIMIX provides your solution for an annual production output from

UNIMIX®

NEXT GENERATION FLEXIBILITY

READY FOR YOUR DEMANDS thanks to the modular construction that makes the new generation UNIMIX uniquely adaptable. Designed for variable filling degrees and a wide range of products. Economical in use for high-quality single batches as well as for a fast high production output.

UNIMIX®

NEXT GENERATION DESIGN

THIS IS HOW THE FUTURE LOOKS which leaves the classic industrial plant design far behind. In the striking design of our NEXT GENERATION UNIMIX, technological leadership shows its most beautiful side. An eye-catcher in your production and a highlight that inspires everyone who has the privilege of working with it.

NEXT GENERATION UNIMIX

THE FUTURE STARTS NOW.

Meet our new UNIMIX family!
