Innovative Brewing Technologies

Bucher Denwel develops and produces a wide range of specialized equipment and provide engineering solutions dedicated to help brewers to optimize their processes.

Bucher Denwel is your reliable single-source supplier for complete Brewery solutions. Our offering now goes beyond superior filtration and Cold Block solutions, and includes high-tech brewhouse and energy management systems, as well as cutting-edge hopping technologies. Our scope includes technological design, supply of the equipment and process automation, installation and commissioning. We offer complete new turnkey projects or upgrades and extensions of existing plants.

We supply innovative brewing equipment such as compact Brewhouses, Energy management systems, Yeast plants, Filtration technologies, Hopping units, Water deaeration, Blending, Carbonation, Dosing and Hard seltzer systems, Dealcoholisation, Cold sterilization, Flash pasteurization, CIP and all types of Beer tanks.

We have a global presence. Our sales and service network are always available for you to provide consultancy, technical support and after sales service.

Bucher Denwel, a member of the Bucher Unipektin group, is a global technological leader serving both industrial and craft breweries.

Water Deaeration AB InBev

Beer recovery Diageo

Kieselguhr filtration FIFCO

Your success is our mission

Bucher Unipektin is your partner and supplier for single units as well as complete lines for the solid-liquid separation, filtration, juice treatment and concentrate production. These beverage technologies are mainly used for the production of fruit juices and purées as well as in brewing beer. But also, for vegetable and citrus juices, flavors and plant extract recovery within the pharmaceutical industry we offer solutions. Further we design and construct industrial vacuum and freeze dryers (lyophilisation). These are, among other fields, used for the production of instant soups and beverages.

Another business area is environmental technology, where we achieve successful results in sewage sludge and industrial sludge dewatering as well as in the solid-liquid separation of drinking water treatment plants.

First class products and services form the base of our market leading position. We operate with high motivation and flexibility with our customers, based on defined needs as well as new market trends' innovative solutions and products are developed. Thereby ecological aspects are respected.
